

VIVO-Fresher Nurses Skill Development Program

This course will provide registered nurses who wish to clinical practice or start clinical practice just after completion of nursing training with core competencies to prepare them for clinical practice in a safe, competent and confident manner. This course bring the depth of caring and nursing insight from their previous experiences to the health care environment enhanced by an update on the latest technology, current management of medical/surgical conditions, and evidenced based improvements in nursing care.

Objective

After completion of the course Participants will be able to:

- Identify the professional roles, responsibilities and clinical judgment required in current registered nurse practice
- Describe the characteristics of the current healthcare delivery system that impact safety, quality, and outcomes for patients
- Identify the biopsychosocial and cultural factors that influence patient's health and healthcare practices
- Demonstrate nursing interventions that incorporate pharmacological principles and safe medication practices
- Apply the nursing process in planning and providing care for patients with selected medical/surgical conditions
